

MSS 21 and MSS 21 touch

Coin deposit system

The MSS 21 is a professional coin deposit solution for every self-service area. Due to its special self-cleaning mechanism it is very resistant against foreign elements and dirt. Easy handling and its unique modularity in terms of different coin-bin solutions make the MSS 21 adaptable for a broad field of applications. The standard version comes with a 4-line dialogue display, but the MSS 21 can be upgraded with a Linux based 10.2" touch TFT or with a Windows based 15" touch TFT. Innovative materials in industrial quality for coin-disk and coin-path ensure high counting speed at a low noise level.
